Enterprise-Grade Industry Connectivity

With reach across 100+ industries and over 5,000 corporate relationships — each with active points of contact — CGS doesn't waste time sourcing talent or partners. We bring the bench, the access, and the answers — day one.

National Reach with Embedded Access

CGS operates with built-in access to every region in the U.S., backed by long-standing, pre-vetted relationships in all 50 states. Our network isn't just national — it's ready-to-activate, giving clients instant boots-on-ground without the ramp-up.

Focused by Choice, Not by Limitation

We specialize in 9 capabilities across 6 core sectors — not because we can't do more, but because we know where we outperform most. Our deliberate focus ensures top-tier execution, faster scaling, and targeted compliance every step of the way.

Federal-Ready Operational Precision

With 16+ SOPs, live QA mechanisms, and a contract-ready infrastructure, CGS is engineered for performance. We don't just deliver — we measure and refine. Every process is backed by data, accountability, and audit-ready systems.

Certifications Pending Approval

PAST PERFORMANCE

Condé Global Solutions is built on over a decade of leadership in business operations, program execution, and stakeholder engagement across public-private environments. Our leadership brings more than eight years of executive-level experience managing high-impact initiatives and developing strategic infrastructure that supports scalable delivery. We have supported regional and national partnerships spanning multiple industries, with a strong focus on operational alignment, workforce strategy, and compliance-backed systems.

Our professional portfolio includes managing relationships with more than 200 employer and vendor partners, including nationally recognized brands and federal-adjacent organizations. We have participated in the strategic planning, performance tracking, and execution oversight of initiatives impacting thousands of stakeholders annually. In total, we have supported or influenced over \$10M in program budgets through collaborative work with corporate and nonprofit entities — with responsibility for partner acquisition, service design, internal systems, and outcome measurement.

At the operational level, we have built over 16 standardized SOPs, multiple service delivery models, and a structured internal framework for onboarding subcontractors and tracking deliverables — all designed with federal compliance in mind. This internal infrastructure allows us to activate contract-ready services efficiently and maintain performance integrity at scale.

CGS leadership also brings direct SBA-aligned experience, including managing a \$35M loan portfolio within just four months while serving as a Business Development Manager for a certified third-party lender. This early exposure to federal lending frameworks strengthened our understanding of procurement, compliance, and financial accountability within public-facing ecosystems.

We maintain a trusted network that spans all 50 states and reflects our deep commitment to partnership, access, and local capacity. Relationship-building is not just a value—it is the operational foundation of how we work, scale, and succeed across service areas, sectors, and regions. While Condé Global is a newer entrant in the federal contracting space, our leadership brings deep professional experience and a proven track record of driving complex initiatives. We are actively positioned to support government agencies at every level, with the infrastructure, agility, and strategic relationships required to perform with confidence and impact from day one.

CORE COMPETENCIES

What We Do

Condé Global Solutions delivers precision-aligned mission support across the most complex government environments. We specialize in critical infrastructure, secure operations, and workforce systems that keep agencies moving without disruption.

Our network spans all 50 states and is built on deep, long-standing relationships across the public and private sectors. With executive oversight, rapid onboarding capability, and compliance-ready frameworks, CGS operates with the discipline of a seasoned prime — even in new spaces.

We focus exclusively on 9 core service categories to ensure mastery over delivery:

- Defense & National Security Systems
- Workforce Development & Cyber Readiness
- Talent Solutions & Workforce Support
- Facilities Management & Base Operations
- Infrastructure Support & Site Services
- Protective Services & Security Operations
- Command Center & Technology Support Services
- Mission Support Logistics & Procurement
- Transportation & Mobility Operations

Why It Matters

Government missions don't fall short because of a lack of vision — they fall short because of execution gaps: unvetted subcontractors, fractured logistics, misaligned staffing, and support partners that can't keep pace with operational demands. Across every agency and sector, the problem is the same — delivery systems aren't built to withstand pressure.

Our capabilities matter because they are engineered to solve exactly that. Whether it's defense infrastructure, secure mobility, or workforce transitions, we treat every contract as a system that must run — without delay, without breakdown, and without the agency needing to manage the gaps. We've designed CGS from the inside out to bring order to complex environments: SOP-backed staffing, centralized oversight, trusted regional networks, and delivery models that can scale within days, not weeks.

What makes us different isn't just what we offer — it's that we understand how work actually moves inside federal systems. Our infrastructure is built to reduce risk, absorb complexity, and make the mission easier to execute. That's why agencies don't just choose based on price. They choose partners who can keep the operation intact.

COMPANY DATA

Condé Global Solutions LLC is a woman- and minority-owned small business built to deliver high-performance administrative, compliance, and workforce support services to public-sector agencies. Founded in 2025, our leadership brings over a decade of cross-sector experience, a proven track record of executing strategic programs, and a professional network spanning all 50 states. Our team is lean, scalable, and experienced in mobilizing support across multiple geographic regions. We maintain an active registration in SAM.gov and are currently pursuing 8(a), WOSB, EDWOSB, and HUBZone certifications. Our infrastructure supports federal, state, and municipal contracting, and we accept government credit cards and purchase orders.
